

**SR-1005**

# INDOOR CO ALARM

## DESCRIPTION:

Carbon monoxide poisoning is a serious matter and the risk of its volatility affects many homes and flats. Therefore, continuous monitoring of the presence of carbon in the air is very important. The sensor Lanberg SR-1005 is a device that not only monitors its level, but also alerts about its dangerous concentration. Good quality sensor, simple operation and elegant design are the main advantages of the product.

## PRODUCT SPECIFICATION:

- Detection Method: Electronic & Chemical Sensor
- Dimensions: 90 x 120 x 40mm
- Weight: 220g
- Power supply: 3 x 1.5V "AA" alkaline batteries
- Operating Temperature: 0-45
- Temperature display: -15~50, ±1?
- Environmental Humidity: 0%~90%
- Static operating current: 80±10uA
- Alarm current: 45-75mA
- Alarm loudness: 85dB (1 meter)
- Gas intensity scope of LED display: 25-550PPM (±10%)
- Battery Indicator
- Pause Function
- Approximate lifecycle of the carbon monoxide detector: 7 years
- CO Alarm Level:
  - 50 PPM --> 60-90 min
  - 100 PPM --> 10-40 min
  - 300 PPM --> 3 min

Accordance with EN 50291-1 : 2010+A1 : 2012 standard confirmed by notified body, in the European Union
